Terracotta warriors illuminate capital at Chinese New Year

Larger-than-life lanterns inspired by ancient Chinese warriors will add a burst of colour to the University of Edinburgh this Chinese New Year (31 January).

The spectacle was created by Chinese artist Xia Nan for the Beijing Olympic Games in 2008 – and this is the first time the Warriors will be showcased in Scotland.

The lanterns are inspired by the army of terracotta soldiers, discovered in 1974 when the tomb of the 3rd Century BC First Chinese Emperor Qin Shi Huang was unearthed in the Xi’an province of China.

The figures were found in an underground vault of 12,000 square meters and comprised of more than 8,000 terracotta sculptures depicting warriors and horses arranged in battle formation. It is thought that they were created to defend the emperor’s immortal soul.

Xia Nan has used traditional Chinese lantern designs to re-imagine this awe-inspiring historic discovery.

As many as 90 brightly coloured figures up to 2.5m tall will populate Old College quadrangle. The lantern army includes women and children as well as men with horses.

The exhibition has been coordinated by the University of Edinburgh in partnership with Event International, with thanks to Chaoyang Cultural Centre, Beijing.

Professor Natascha Gentz, Director of the Confucius Institute for Scotland in the University of Edinburgh said: ‘We are delighted to be showcasing this incredible exhibition to coincide with Chinese New Year. People of all ages are sure to be wowed by the scale and beauty of the lanterns, while also learning about this important aspect of Chinese history.’

The Lanterns of Terracotta Warriors outdoor exhibition will go on show at the University of Edinburgh’s Old College Quadrangle from 29 January until 7 February, 4pm - 9pm. Entry is free.

A photocall will take place on Wednesday, 29 January at 4pm. Further details will be sent to picture desks on 28 January 2014.
